- ❖ Create and maintain databases using Postgresql, Mysql, SQLite
- ❖ Deploying Django application with Pythonanywhere, AWS EC2

PROJECTS

Project accounting application: Timesheet

Project accounting software

To design and develop a web application to report the development hours and generate the desired reports.

Roles involved: Design and develop APIs for various software features.

Technologies used: Python, Django Rest Framework, Git

Database: Postgresql

SKILLS

Programming Languages Frameworks

- ❖ Python, HTML, CSS
- ❖ Django, DRF, Flask
- ❖ Bootstrap

Technologies

- ❖ Celery, Celery Beat
- ❖ Django Channels
- ❖ Elastic Search
- ❖ Docker
- ❖ Stripe
- ❖ Selenium
- ❖ Deployment
- ❖ React js

Databases

- ❖ Postgresql, Mysql, SQLite

Tools

- ❖ Git, Jira, Bitbucket, Github

Softwares

- ❖ Pycharm, VScode, Postman, Swagger, Adobe XD/Figma

OS

- ❖ Ubuntu

Educational Qualification

Bachelor of Technology:

Mechanical Engineering (2013 - 17) Calicut University, Kerala , Nehru college of Engineering and Research center , Pampadi Thrissur

Yacht Brokerage network

Yatmatch

Yatmatch is a platform that uses AI to help yacht brokers find the perfect yacht for their clients. It does this by connecting brokers with yachts that match their clients' needs
